### Student worker Application

My name is Qian Zhang, and I am 31 years old, who comes from China and living together with my Danish husband in Holstebro. I am a first-year student in the Master Degree program *Technology-based Business Development* at Aarhus University in Herning.

When I was 18 years old, I already knew that I was very interested in how to develop a healthy life style; that's why I chose my bachelor program (Food Science and Engineering). After having graduated, I worked in a big collectivized company which had two subsidiaries. To begin with, I was working as a secretary and purchasing assistant for 3 years in the branch of the company which produced and exported chicken. Because of the company's need for development, I was promoted to the project manager in the business R&D department in the property development branch of the company. I was responsible for three projects. These jobs have given me a strong ability to understand customers' needs as well as good communication skills, good ability at building network, good interdisciplinary learning and researching competencies.

I possess the following skills which may be relevant:

- \* Very good speaking and writing skills in Chinese and English.
- \* Very good ability in collecting data and arrive at conclusions on the basis of those data
- \* Very good user of e.g. MS office (and I am a quick learner).
- \* Very good presentation and communication skills.
- \* Very good collaboration and interpersonal skills.
- \* Very good understanding of science and business.
- \* Speaking and writing skills in Danish.

I can work 10-15 hours per week, I have 2 years remaining study time, which I can apply my theoretical knowledge into practice. My time can be very flexible. I am a teamwork player, self-driven, positive person.

I am very interested in student project which is in food industry and business development filed. I am ready for a new set of challenges and an opportunity to bring all I have learned to a more challenging and rewarding position.

Best regards,  
Qian Zhang,
